

BLASTING CABINETS

- Manual and automatic
- Designed for processing of small parts
- Suitable for various abrasives
- Can be combined with the ventilation and filtration system
- Automatic recovery system of the abrasives

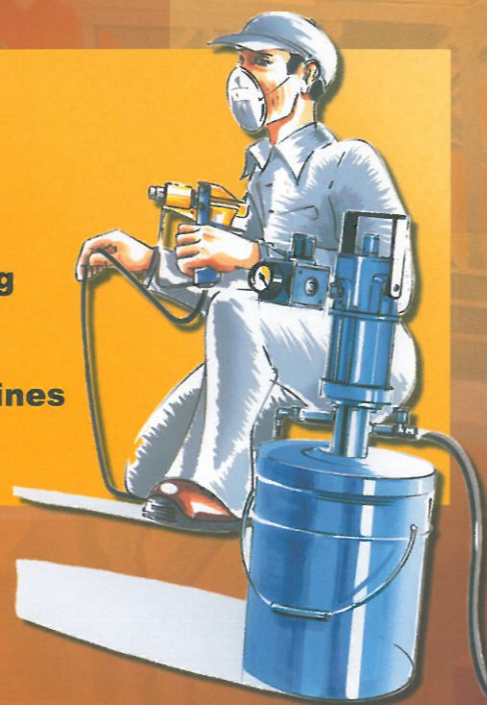

EQUIPMENT AND MATERIALS

- The extraction cabinets for paint dust
- Grinding tables with the dust extraction and filtration
- Abrasive pumps and recovery systems
- Blast equipment without dust
- Control and measuring devices
- Filters and filter cartridges
- Filtration systems and ventilators
- Spare parts
- Abrasives

PAINTING EQUIPMENT

- Airless spraying
- 2K equipment
- Feed pumps
- Injection machines
- Sprayers
- Accessories

SHOT BLAST MACHINES AND LINES

Designed for automatic processing of the surface of castings, profiles, sheets, structures and other products using the abrasive stream. The abrasive stream generated by the turbines cleans and roughens the processed surface.

The collection and recovery system of the abrasives ensures circulation within a close cycle and efficient separation of dust. Dust is extracted into the filter; therefore the work environment is always flawlessly clean and meets the highest requirements.

- Roller conveyor shot blast machines
- Tunnel type shot blast machines
- Hook type shot blast machines
- Belt conveyor shot blast machines
- Shot blast machines for pipes
- Rotary table shot blast machines
- Shot blast machines for drums and gas bottles
- Shot blast machines for wire and bars
- Special shot blast machines

SHOT BLAST ROOMS

- Various dimensions
- The modular structures are fully equipped
- Automatic collection and recovery system of the abrasives

- It can be mounted without recess
- Numerous combining and assembly options
- It is possible to use two types of the abrasives
- Single or several operator

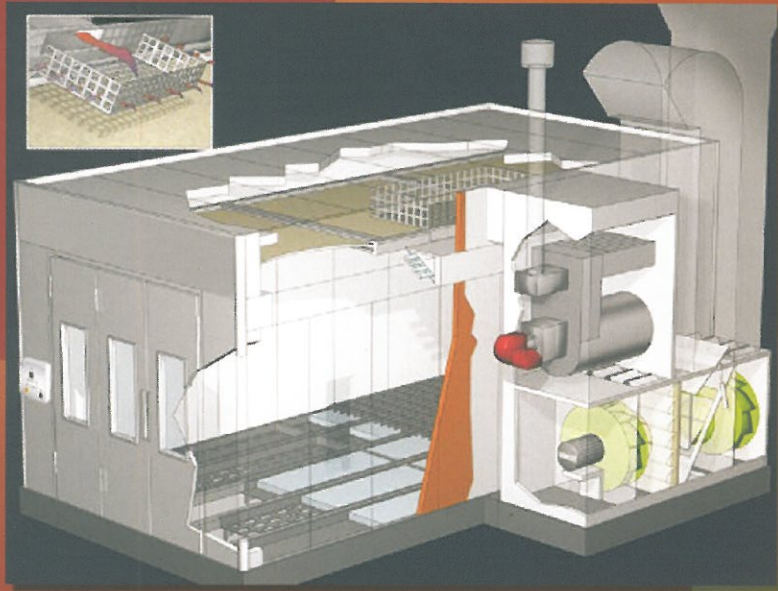

EQUIPMENT FOR THE SHOT BLAST ROOMS

- Collection and recovery systems of the abrasives
- Ventilation and filtration systems
- Automatic platforms for the operator
- Lamps
- Ventilation channels, cofferdams and shutters
- Gates and doors
- Rubber for the walls

SPRAY BOOTHS

- **Designed for industrial application, spraying and drying**
- **Various dimensions**
- **The modular structures are fully equipped**
- **Numerous combining and assembly options**
- **Heating using various energy sources**
- **In conformance with the EU standards and requirements**
- **Automatic platforms for the operator**
- **Safe systems**
